

## Photocopying and scanning from the internet

If you wish to photocopy or scan material from the internet for course packs, mounting on Moodle or distribution to students, specific permission must be obtained from the web page owner unless there is a disclaimer on the web site permitting use of the material.

If you do gain such permission please keep a record and pass the details to [the Library Service](#) using the form below. This is for the purpose of maintaining a central record of permissions obtained.

 [Form to record material not covered by CLA but where permission of rights holder have been gained.](#)

Links to internet pages may be posted and given to students so long as the page they are directed to opens in a new window which clearly shows where the article originates from.

Further information is available from:
