School of Nursing & Midwifery  
Management of Accidents/Incidents

Accident Process – Student Nurse/Midwife

If an incident involves injury or harm to a Nursing or Midwifery student (including a needlestick injury), the School should be informed by telephoning the answering machine on 01224 262932 or by email to studentcentre-nursing@rgu.ac.uk. A Datix form should also be completed and processed in the normal way. If a medication incident occurs involving a Student Nurse/Midwife the PEL should be informed by telephone and the Datix form sent as above.

The School will offer advice and information to the student as required. Please consult the needlestick chart for further actions required for a needlestick injury and the medication Incident policy for medication incidents.
